Redux. Webpack. SCSS. JSDoc. Swagger. Jest. Redux. React-Native. Socket.IO. Express JS. Cloud integration and deployments with AWS tools like S3, Lambda

EXPERIENCE

UI/UX Developer IV, Infosys

2019 – present

Sunnyvale, CA

Angular 2 UI developer, Infosys contractor at Apple

- Responsible for clean and artful design translation of wireframes to applications. Incorporate UI and be able to translate requirements into interaction flows and artifacts from granular style elements to themes of application, and transform them into beautiful, intuitive, and functional user interfaces. Strong emphasis on modern JavaScript frameworks required by Apple's style guides and constant communication between client and other contractors to achieve the vision of the design team.

SFMC CRM Front End Developer, Bing Ads

2018 – 2019

Seattle, WA

SalesForce Marketing Email Developer, TCS contractor at Bing Ads Microsoft

- Constructed emails based off template for more than 30 global markets using Amp-Script for responsiveness and HTML as the skeleton. Responsibilities included constructing emails based from wireframes, manipulating image assets in to responsive designs compatible across multiple platforms and

devices using CSS. Worked thru a rebranding of the company and migrated data from SFMC Classic Content Builder to Content builder when "Bing Ads" changed to "Microsoft Ads."

EDUCATION

Code Fellows – Seattle, WA – Advanced Software Development in Full-Stack JS

- Build full-stack web applications with server-side Node.js and modern, client-side, front-end libraries and frameworks, including React. This intensive course covers data structures and algorithms, professional software development techniques, and established industry best practices in full-stack JavaScript.

Excelsior College – Albany, NY – Bachelors of Computer Science

- Strong background in fundamentals of computer programming and complementary liberal arts background for improved problem-solving. GPA of 3.8, diploma completed in 2018.
